

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-14. (Canceled)

15. (Previously Presented) A wrapper of a smoking article of an electrical smoking system wherein tobacco is contained by the wrapper, the wrapper comprising a cellulosic web material and at least one filler therein, the filler being effective to reduce the content of gaseous components in the smoke produced upon combustion/pyrolysis of the smoking article in the electrical smoking system, wherein the filler includes an ammonium-containing compound filler in an amount effective to reduce aldehyde content in the mainstream smoke produced upon combustion/pyrolysis of the smoking article, wherein the ammonium-containing compound filler is a solid solution of magnesium ammonium phosphate and magnesium potassium phosphate or any of their respective hydrates.

16-21. (Canceled)

22. (Previously Presented) A cigarette of an electrical smoking system comprising a tobacco web surrounding a tobacco rod, a paper wrapper surrounding the tobacco web, and an optional filter at one end of the cigarette, the paper wrapper comprising a cellulosic web material and at least one filler therein, the filler being

effective to reduce the content of gaseous components in the smoke produced by combustion/pyrolysis of the cigarette in the electrical smoking system, wherein the filler includes ammonium-containing compound filler particles in an amount effective to reduce aldehyde content in the mainstream smoke produced upon combustion/pyrolysis of the cigarette, wherein the electrical smoking system does not produce sidestream smoke.

23. (Previously Presented) A cigarette of an electrical smoking system comprising a tobacco rod contained by a paper wrapper and an optional filter at one end of the cigarette, the paper wrapper comprising a cellulosic web material and at least one filler therein, the filler being effective to reduce the content of gaseous components in the smoke produced by combustion/pyrolysis of the cigarette in the electrical smoking system, wherein the filler includes ammonium-containing compound filler in an amount effective to reduce aldehyde content in the mainstream smoke produced upon combustion/pyrolysis of the cigarette, wherein the ammonium-containing compound filler consists essentially of magnesium ammonium phosphate and/or calcium ammonium phosphate

24. (Canceled)

25. (Previously Presented) A cigarette of an electrical smoking system comprising a tobacco web surrounding a tobacco rod, a paper wrapper surrounding the tobacco web, and an optional filter at one end of the cigarette, the paper wrapper comprising a cellulosic web material and at least one filler therein, the filler being

effective to reduce the content of gaseous components in mainstream smoke produced by combustion/pyrolysis of the cigarette in the electrical smoking system, wherein the filler includes an ammonium-containing compound filler in an amount effective to reduce aldehyde content in the mainstream smoke produced upon combustion/pyrolysis of the cigarette.

26-28. (Canceled)

29. (Previously Presented) A cigarette of an electrical smoking system comprising a tobacco web surrounding a tobacco rod, a paper wrapper surrounding the tobacco web, and an optional filter at one end of the cigarette, the tobacco web comprising tobacco and at least one filler therein, the filler being effective to reduce the content of gaseous components in mainstream smoke produced by combustion/pyrolysis of the cigarette in the electrical smoking system, wherein the filler includes an ammonium-containing compound filler in an amount effective to reduce aldehyde content in the mainstream smoke produced upon combustion/pyrolysis of the cigarette.
